

ECS 253 / MAE 253, Network Theory and Applications

Spring 2023

Problem Set # 3a, Due May 15

An proposed outline for your project

1. Write a 2-3 sentences with the goal of the project.
2. Outline your plan of attack, and give preliminary results.
3. Itemize the stumbling blocks you foresee that will keep you from achieving the desired outcome.
4. Each team member must turn in their own assignment. The outlines can be the same, but come up with your own ideas about stumbling blocks. Also, the more people on your team, the more we expect you to have accomplished by now.
5. Each assignment should be approximately 3-4 pages in length (double spaced). Length also can depend on number of teammates.
